Evidence-led prospecting for businesses that sell to businesses

Know who will buy before you say hello.

Tell us what you sell in your own words. We find the businesses that need it, show you the proof, and write the WhatsApp or email message that earns a reply. You approve every word.

TWO ENGINES, ONE INBOX

Catch buyers who are ready. Warm the ones who will be.

CAPTURE DEMAND

Reach buyers at the moment of need.

We look for real signals: a new branch, a hiring push, a public request for a supplier. You get the buyer, the signal and the reason to call, while the window is open.

GENERATE DEMAND

Open doors before the need appears.

Perfect-fit businesses with no signal yet go on a patient track: a respectful first note, a useful angle, and a follow-up when something changes. Your pipeline fills before you need it.

HOW IT WORKS

Three steps. One thing at a time.

1

Tell us what you sell.

Type it like you would say it to a friend. We ask one smart follow-up at a time, only about what we still need to find the right buyers.

2

Watch it do the homework.

It searches, opens each business's own pages, checks they match your must-haves, and drops the rest. You see every step as it happens.

3

Approve and reach out.

Pick your buyers, edit the drafts, choose the channel. Messages go out from your own sender, on the schedule you set.

RIGHT MESSAGE, RIGHT CHANNEL

A short hook for WhatsApp. A fuller case for email.

WHATSAPP

Hello, congratulations on branch number two. Want a trial order this Friday?

Two lines, one fact, one easy yes.

EMAIL

Restocking two branches without the stress

I saw you are opening a second branch. Teams in that spot often struggle to keep both shelves full. We could handle the weekly run for you. Open to a ten minute call?

Room for context, still under 80 words.

DIRECT MESSAGE

Congratulations on the new branch. We supply shops your size. Worth a quick chat?

A warm opener that asks for nothing big.

Sample output. Real drafts cite the source behind every fact, and you approve each one.

WHY YOU CAN TRUST IT

It shows its work, and admits what it does not know.

Every claim has a source.

Tap any fact in a message to see the page it came from.

Unknowns stay visible.

Budget, timing and the decision maker are marked unconfirmed until a human confirms them.

You hold the send button.

No message leaves until you approve it. Every one carries an unsubscribe route.

WHY THIS MESSAGE

A fact we found

They announced a second branch.

View source: their Instagram page

Our hypothesis, not confirmed

Stocking two sites is harder than one.

Your offer

A fixed weekly supply schedule.

A small ask

One trial order, no commitment.

We never claim a problem we have not confirmed. If the facts change, the message says so too.
